## SILICONE IMPRINT COLORS

	BLACK		WHITE
---	-------	---	-------

If no specific PMS color is noted on order, factory will use closest PMS color based on the chart above.

Ink Color Chart is for reference only, PMS Color match is \$25.00 (v) per color, per order.

Due to inherent variances in product colors and surfaces, an exact match to the PMS color cannot be guaranteed. However, we will make every reasonable effort to produce the closest possible equivalent.

Please note that color perception may vary depending on individual display settings, lighting conditions, and the material's surface. As such, an exact PMS match may not appear the same across different mediums

Different materials absorb and reflect ink differently, which can result in variations in color matching. While we strive for the closest possible match, the final product may not exactly replicate the PMS color due to these material limitations.

Environmental factors such as temperature, humidity, and exposure to light can affect the appearance of colors over time. We cannot be held responsible for changes in color due to environmental conditions post-production.

PMS Color Match cannot be guaranteed on dark color items or stainless steel.

PMS matching is not available on four color process artwork.
