

LASER WRAPPING SIZING CHART

Additional Laser Wrap Engraving information:

1. Seam Clearance Notice (2 mm – 4 mm): Rotary full-wrap engravings carry an intentional unengraved gap or overlap buffer of 2.0 mm to 4.0 mm at the start/end point. Artwork will not be seamlessly stitched, and this margin is a necessary mechanical buffer for rotary chucks and drive rollers.

2. Raw Metal Variations: On metal products, marking tones depend on chemical alloy composition and heat absorption. Raw metal color matching across different batch runs is not guaranteed.

3. Factory Surface Artifacts: Bare Metal products naturally exhibits grain direction and micro-scratches from factory stamping. Laser engraving highlights these underlying metal characteristics rather than concealing them.

LASER WRAPPING SIZING CHARGES		
Logo Size (inches)	Setup Fee (v)	Run Charge (v)
Up to 4 SQ.IN	\$60.00	\$1.50 / unit
Up to 9 SQ.IN		\$3.75 / unit
Up to 12 SQ.IN		\$5.50 / unit
Up to 20 SQ.IN		\$10.00 / unit
Up to 40+ SQ.IN		\$17.50 / unit
